

NGUYEN VAN CHINH

Full-stack developer

Date of Birth: 24/05/2001

Gender: Male

Phone Number: 0964358394

Email: chinhnv24052001@gmail.com

Website: https://chinhnv24052001.github.io/CHINHNV_CV2026/

Address: Phuc Hoa Hamlet 5, Phuc Tho Commune, Hanoi City

CAREER OBJECTIVE

I aspire to develop my career as a Full Stack Developer, where I can leverage both backend and frontend skills to build comprehensive, efficient, stable, and scalable products. I am committed to continuously learning more about system architecture and DevOps.

EDUCATION

2019 - 2023	Ha Noi University of Civil Engineering Information Technology Engineer • Major: Software Development • Graduation Thesis: Developing an E-commerce Web System (MySQL, Node.js, Vue.js)
-------------	--

WORK EXPERIENCE

02/2021 - 06/2023	VN Cloud Technology Company Intern Web Developer • Developed web UI using HTML/CSS/JS Angular • Designed and implemented databases with SQL Server • Built RESTful APIs using C# .NET • Gained experience with Teamwork, Git (git flow), Postman, ...
07/2023 - 03/2024	Ominext Company Full Stack Developer • Collaborated with a team of 3 developers, 1 tester, and 1 bridge engineer to maintain projects: TMES – a web-based system for managing medical examination processes at Japanese hospitals and SJE – a web application for appointment scheduling and medical examination result tracking at Japanese hospitals. • Technologies used: Frontend with AngularJS, Backend with .NET C# and .NET VB, Database with SQL Server. • Handled assigned tasks on Redmine, ranging from updating specifications and fixing bugs to more complex challenges such as optimizing system performance. • Had the opportunity to work in the Omi environment (similar to Japanese companies), where I acquired fundamental knowledge and core values, and applied them to real-world tasks.
03/2024 - 02/2026	Balocco Company Full Stack Developer, Team Leader • Maintained the YAMACHI project – a nursing home management system in Japan, utilizing ReactJS for the frontend, NodeJS for the backend, and MySQL for the database..

- Project Leader for **AB Test** – a project measuring user engagement on websites using platforms such as Abtasty, VWO, and Optimizely. Served as developer and team leader of a group consisting of 3 developers and 1 bridge engineer, implementing customer-requested experiments with JavaScript, HTML, and CSS integrated into these platforms.
- Internal project **100-challenge**, where each member developed an AI chatbot integration project for internal use, utilizing **PHP Laravel, VueJS, MySQL, n8n API** and the **Cursor tool**:
 - **Chatbot-Graprise**: Answered questions related to compiled AB test documentation
 - **BLC-Email-Auto**: Automated email notifications based on Google Sheets data
 - **Leave-Request Automation**: A system that allows employees to register leave requests and automatically approve them

SELF - LEARNING ACTIVITIES

2024 - Now	Improved skills and engaged in continuous learning outside of working hours. Full stack developer • Developed and upgraded the Agricultural Extension web system of Hà Tĩnh Province using PHP CMS – WordPress. • Researched ideas for developing a Zalo mini app. • CIVILIZE restaurant order management system integrated with electronic signatures and e-invoices.
